

HOW TO PREPARE FOR OUR FIRST MEETING?

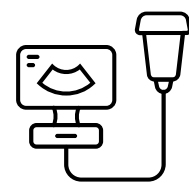

1 Essential lab tests

You have to provide me with Your pet's full blood exam, an extended blood chemistry and ionogram.

2 Additional tests

Sometimes I can ask You to deliver extra tests because of Your animal's medical issues, e.g. an ultrasound.

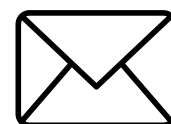

3 Questionnaire

After booking a visit, You're going to get a questionnaire on Your e-mail. Please, be as thorough as possible.

4 Sending all information

Send me all of Your pet's test results and a completed questionnaire to: petstudyp@gmail.com

5 All done!

Don't forget about our meeting.
Should You have any questions - message me!
